

PHOTOSATIN PREMIUM RC

270 gsm

PhotoSatin Premium Resin Coated consists of an alpha cellulose acid-free art paper coated with a structured polyethylene and a microporous receiver layer. This exceptional photographic paper has been designed to comply with the highest lifespan requirements.

The surface aesthetic of PhotoSatin Premium RC is reminiscent of the original photochemical papers traditionally associated with the Baryta market. This paper gives softened reflections on photographs. It is a great choice for black & white and colour photography.
