- The next best thing to the commercial digital solution -

Works with both
Mac & windows

Product Information:
Dimension: 10.78"x 7.2"x 3.81"
Weight: 4.85 lb
UPC: 649899001370
Made in Taiwan

The Pacific Image PrimeFilm 7250Pro3 Film Scanner provides high quality scanning capability of 35mm slides and negatives with a resolution of 7200 dpi and a dynamic range of 3.6D. The scanner is also an impressive productivity tool with the ability to batch scan 35mm strip film up to 40 frames and the Digital ICE3 Image Correction and Enhancement system that ensures that your scanned images are the best quality possible. It does this by automatically removing dust and scratches, restoring color to faded films, and minimizing image graininess.

Product features and benefits

- **7200 dpi Resolution:** Scan your 35mm slides and negatives at an incredible resolution of 7200 dpi and be able to produce professional quality prints up to 12x18" or larger.
